

SCALO

Design: Jean Nouvel

+ JeanNouvelDesign

A revolutionary new beam seating solution with a minimal, linear and well-defined structure —

As per Matteograssi's heritage, the Coach Hide Leather is worked artfully to provide a seamless construction, while providing an extremely durable and long lasting product.

While also available in PU, the Coach Hide Leather is where this product truly shines, as the leather can be maintained like new over decades.

An innovative option allows to include both materials in the beam, coach hide and PU, thus combining the durability of the leather and the soft comfort of PU in the seat backing.

The Beam Seat Arm Rests become a technological hub, thanks to the electrical sockets and USB recharge points allowing Passengers to charge laptop and portable devices in any position. The furniture recalls the architecture of the buildings designed by the French designer, perfectly matching with the space requirements of an airport.
