A customizable multiple seating system with I-beam support —

Meeting propose multiple seating solutions on beam support with seating units entirely covered in coach hide or in perforated aluminium with seat and back cushions in coach hide or soft leather.

The seating system can be assembled and disassembled in a very easy way, even in case of different configurations by adding or taking away some components.

All these combinations permit to have different configurations of compositions in different areas without changing the environment design concept but offering different levels of comfort.

The Coach Hide Leather is worked artfully to provide an extremely durable and long lasting product.

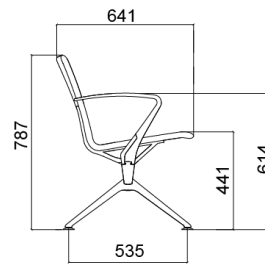

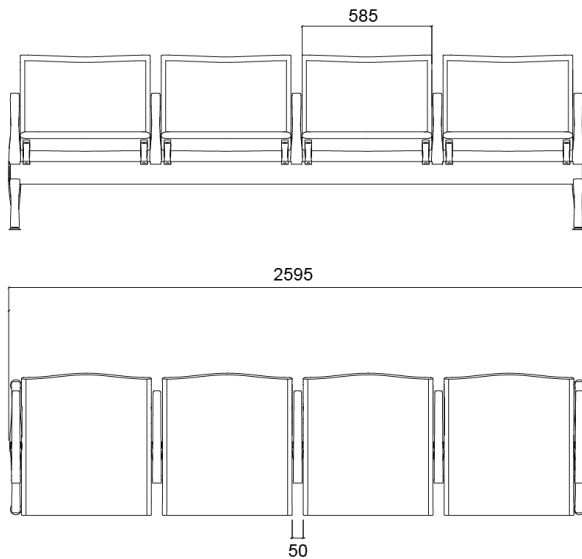

Electric socket and USB technology integrated in a high quality beam.

The seats can be realized with high back and eventually equipped with foot-rest.
