HS

**WAVE**

WAVE

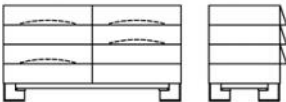

The Wave collection is a design of contrasts. It mimics the sea with undulating waves and subtle shadows following across the surface while being contained in an angular box traversed with regular, linear stripes.

The waves serve as handles giving a softness and sinuousness to the surface of each cabinet against a backdrop of rigid MDF boxes and frame, covered in beautiful Matteograssi coach hide.

## TECHNICAL INFORMATION

### COVERS

**Cuoio Miura (CM).** Coach hide . It is produced from bull skin exclusively of European origin. The part normally used is the back, thickness is from 2,2 to 2,4 mm. It is chrome and vegetable tanned, dyed in the tub with pure aniline and finished with polyurethanic pigments.

**Cuoio Classic (CU).** Coach hide. It is produced from full grain cowskin exclusively of European origin. The part normally used by is the shoulder, thickness is from 3 to 4 mm. It is vegetable tanned, dyed in the tub with pure aniline and finished with aniline and semi-aniline depending on the colour.

**Cuoietto (CS).** Soft leather. Full grain cowskin exclusively European origin. Thickness is from 1,8 to 2,0 mm, obtained with chrome and vegetable tanning, dyed in the tub with pure aniline and finished with aniline.

**Pelle Soft (PS).** Soft Leather. Cowskin with thickness from 1,4 to 1,6 mm., obtained with chrome tanning, dyed in the tub with pure aniline and finished with polyurethanic pigments.

**Pelle Fire (PF).** Soft Leather. Cowskin with thickness from 1,1 to 1,3 mm., obtained with chrome tanning, dyed in tub with pure aniline and finished with polyurethanic pigments, fire resistant "Class 1".

**Pelle Smooth (PT).** Soft leather. It is produced from smooth grain cowskin of European origin with thickness from 1,0 to 1,2 mm. Obtained with chrome tanning, dyed in the tub with pure aniline and finished with polyurethanic pigments.

**Pelle Light (PL).** Soft Leather. Full grain cowskin of European origin with thickness from 1,4 to 1,6 mm., obtained with chrome and vegetable tanning. Dyed in the tub with pure aniline and finished with aniline and semi-aniline depending on the colour.

### High Quality (HQ).

**Pelle Sweet (cat. S).** Soft leather. Full grain cowskin exclusively European origin, natural grain. Thickness is from 1,8 to 2,0 mm, obtained with chrome and vegetable tanning, dyed in the tub with pure aniline and finished with aniline.

**Pelle Pure (cat. U).** Soft leather. Full grain cowskin exclusively of European origin with smooth natural grain. Thickness is from 1,4 to 1,6 mm, obtained with chrome and vegetable tanning, dyed in the tub with pure aniline.

**Pelle Nabuk (cat. N).** Natural grain cowskin, suede finish, exclusively European origin. Thickness from 1,1 to 1,3 mm, obtained with chrome tanning , dyed in the tub with pure aniline.

### WOOD FINISHES

**Mat Lacquer (H)** Closed pore pigment base , embossed mat polyurethanic finish. It is available in all the colours of the collection.

**Persia Walnut (N)** (Junglas regia). Semi-open pore mat antiyellowing transparent polyurethanic finish.

**Oak (Q)** (Quercus alba). Open pore mat finish, semi-transparent for stained graphite (QG) and for bleached (QS), pigment base for lacquered black (QN) and for lacquered grey (QY). The varnishes used for the finish are the following: antiyellowing polyurethanic for stained graphite (QG); acrylic for bleached (QS); polyurethanic for lacquered black (QN) and lacquered grey (QY).

### METAL FINISHES

**Epoxy painted (A).** Finishing obtained with epoxypolyester resins base applied with a film from 80 to 120 micron thickness and stoved.

**Anodizing (B).** Finishing obtained with a patented process of electroimpregnation. This finish is exclusive for aluminium parts. The thickness is from 10 to 20 micron.

**Chrome Plating (D).** Finishing obtained with galvanic process of two nickel-plating layers and one surface chrome layer. The whole thickness is from 10 to 20 micron.

**Burnishing (E).** Finish obtained through manual oxidation of the metal or through immersion. It is protected on the surface with a transparent epoxy painting.

**Polished Aluminium (L).** Finishing for aluminium parts obtained with vegetable fibre polishing and polishing paste.

**Satined Nickel Plating (M01).** Finishing obtained with galvanic process of multi-layer nickel-plating, with one stained layer on the surface protected with epoxy transparent varnishings. The whole thickness is about 20 micron.

**Black polished Nickel Plating (M02).** Finishing obtained with galvanic process of multi-layer black nickel-plating, with epoxy transparent varnishings on the surface. The whole thickness is about 20 micron.

**Satined stainless steel (W).** The glazing of the stainless steel is one finish obtained directly on the same material, by a light brushing in one direction and with a rotating metallic brush, always in one direction.

## MARBLES AND GRANITES

**Bianco Carrara marble.** White/Grey marble with white veins and natural glossy or polyester finish. Origin: Tuscan Alps (Italy).

**Nero Marquinia marble.** Black bottom marble with white veins and polyester finish. Origin: Guipuzcoa (Spain).

**Nero Assoluto granite.** Fine and uniform grain black granite, natural polished finish; the surface may have lighter shades, on a darker background, Origin: South Africa

## GLASSES

**Clear glass.** Transparent, bevelled clear glass.

**Satined.** Bevelled glass obtained by acid processing.

**Bronze.** Bevelled and tempered bronze glass, with varnishing on reverse side. Smoked. Bevelled and tempered smoked glass, with varnishing on reverse side.

**Black.** Bevelled and tempered glass black painted on the reverse side.

**White.** Bevelled and tempered extra light glass white painted on the reverse side.
