rbga | BLENGINI
GHIRARDELLI

Following the tradition of Matteo Grassi 1880 Interior we used leather to create NEXT, a new automatic beam seating system with an understated design. According to the use, the beam can have 2, 3, 4, 5, or more places, or back-to-back solutions.

Convenient table tops can substitute for or integrate with the seating units. Next has a unique feature in the world: the electrification can be placed on the armrest to charge computers or other devices.

Many airports in the world have chosen Next in order to offer the most comfortable experience to travellers.

Coach Hide Leather

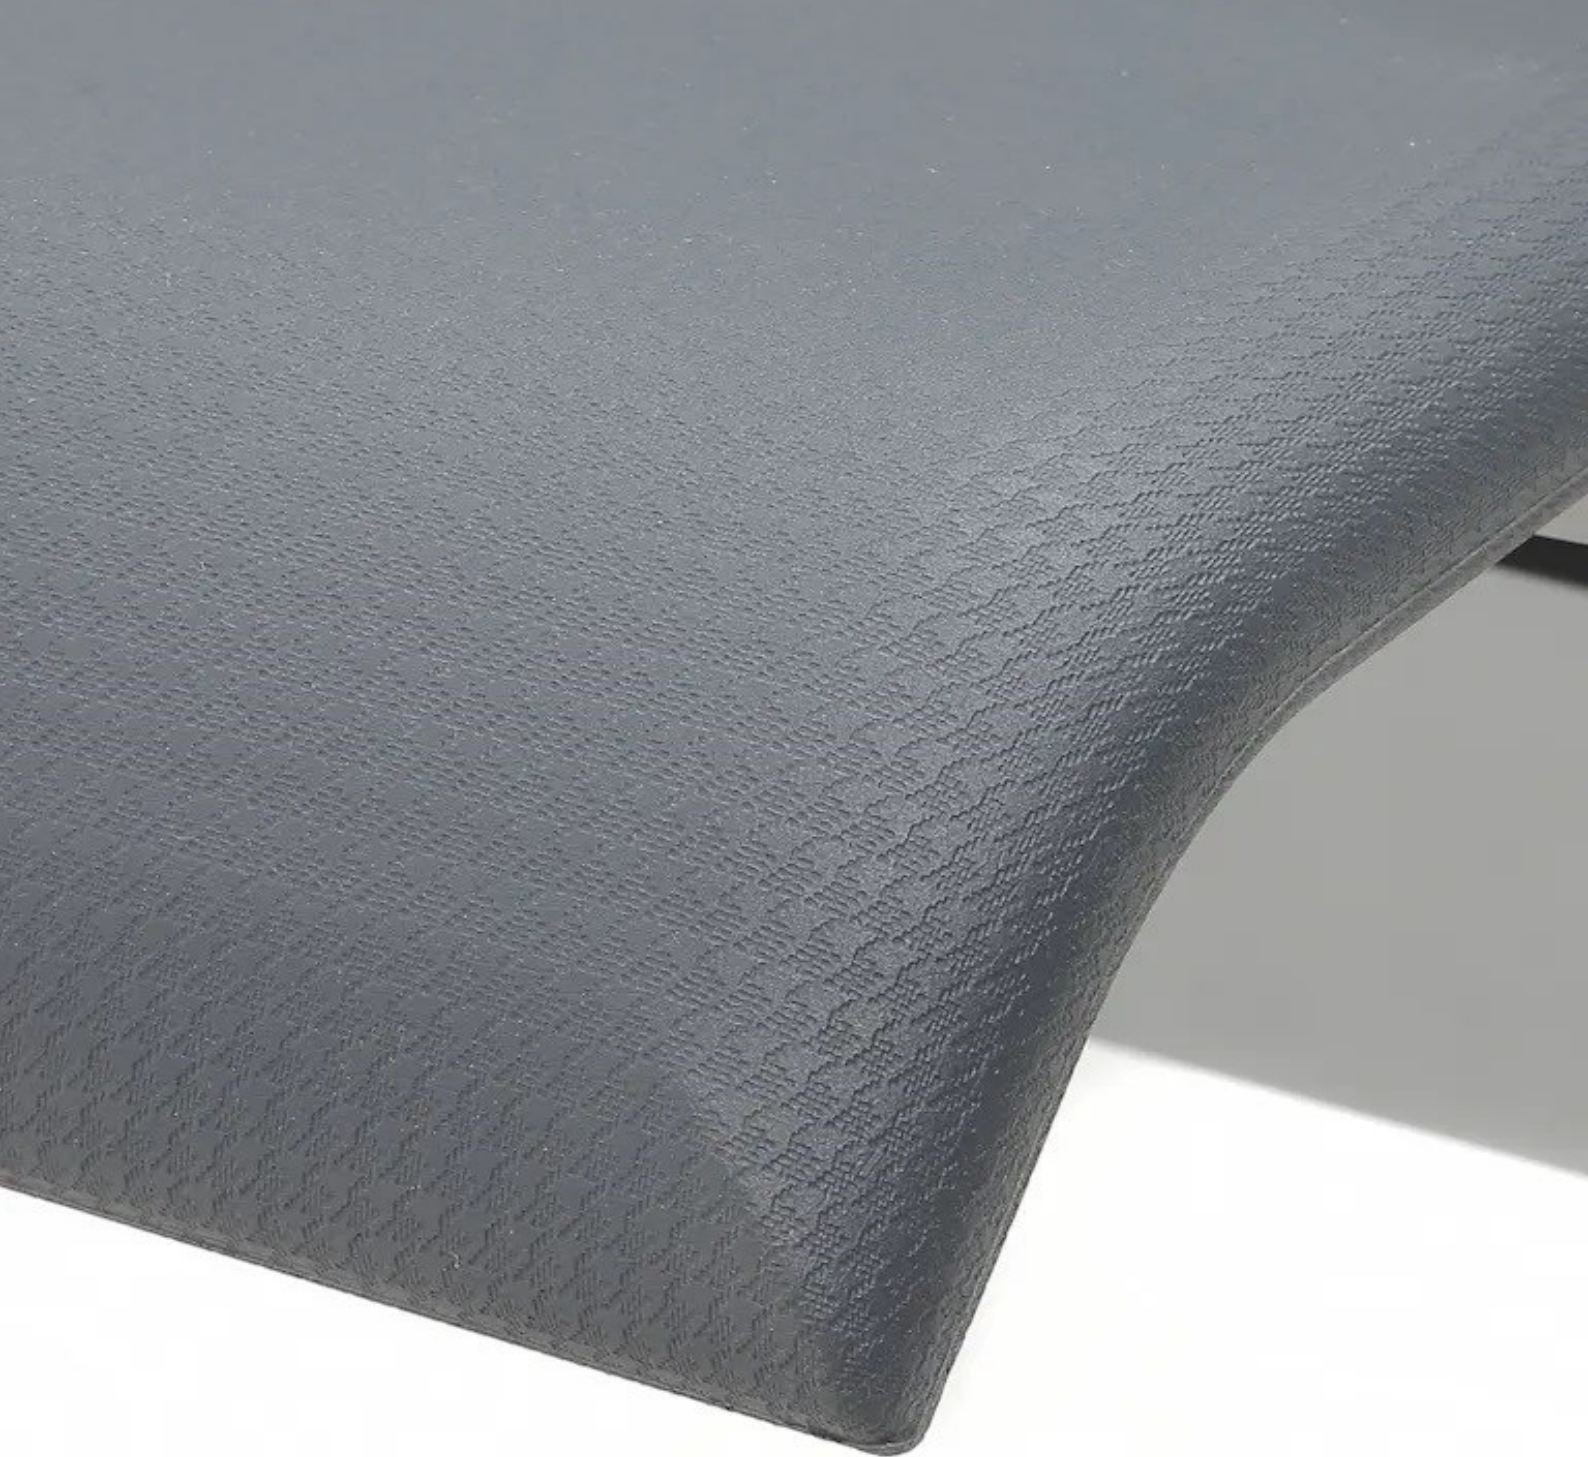

Durability, Longevity, Quality and Comfort .

matteograssi

A touch of elegance and refinement for
high traffic public spaces.

Polyurethane

Durability, Versatility, Quality and Comfort .

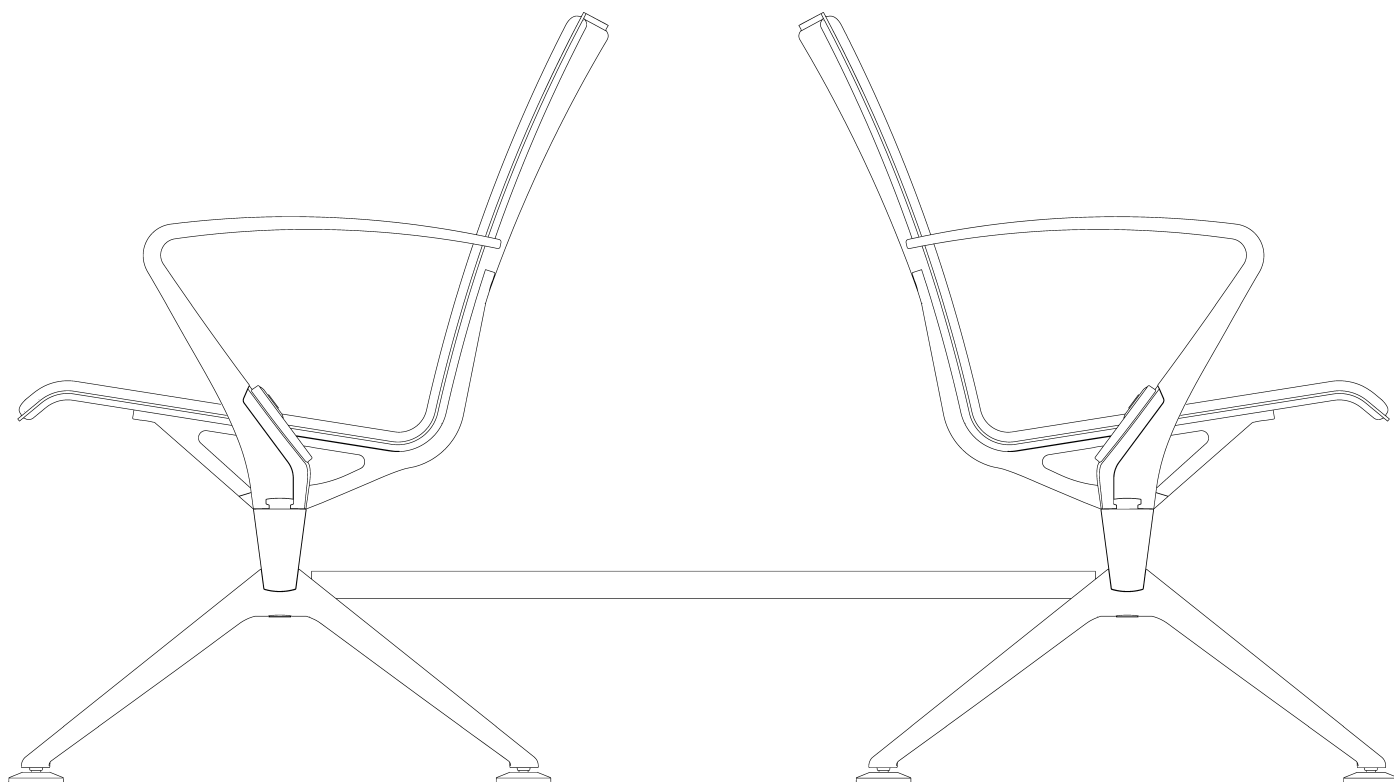

According to the use, the beam can have
2, 3, 4, 5, or more places.

Back to Back

The Next can be provided with Back to Back supports.

Recliners

Recliner seats are available with and without tables, configurations can be provided to suit customer requirements.

A simple, effective and future proofed solution to power, provides simplicity and access for all your power needs.

Modular Electrical socket and USB technology located in the armrest for easy access.

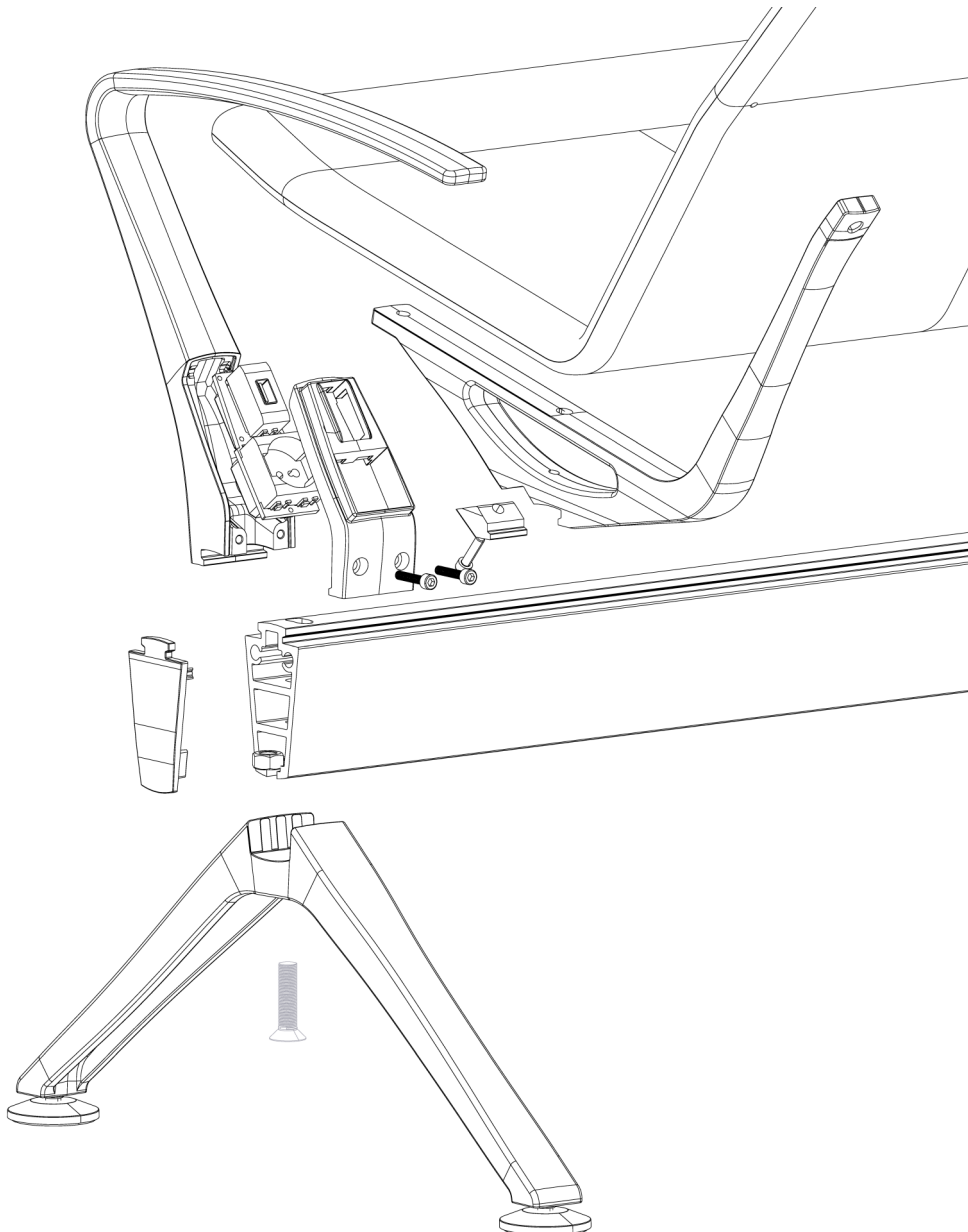

Modules are easily swapped or replaced to provide different connection types including USB-A, USB-C, European , British and US Socket Types.

Sustainability by design

Matteograssi believes in providing sustainable and long lasting Products by design.

Our Beam Seating is designed using Aluminium to facilitate recycling and our Seat Shells are stackable for easy Transport and cost efficiency .

The Next's structural components are easily broken down into smaller components to facilitate transportation, assembly on location and maintenance activities.
